ahead of the game in sports equipment

sportsSAFE

Gymleader is one of the most recognised brands of sports equipment in schools and recreation facilities throughout New Zealand.

At Gymleader we recognise that it is vital to keep your equipment in safe working condition. Through intensive use and wear and tear sporting equipment becomes worn and possibly unsafe. For this reason Gymleader now delivers a comprehensive **5-step maintenance check** through our **sportsSAFE** programme.

SportSafe provides a safety service inspection on all brands of sporting equipment by our qualified evaluator. You will receive a 'Safety and Maintenance Report' to help meet Health and Safety requirements.

There are two types of sports equipment - permanently installed and relocatable.

To ensure a safe environment, irrespective of the amount of use, sporting equipment must be checked each year.

These checks form the basis of an **Annual SportSafe Inspection**.

sportSAFE 5-step Maintenance Programme

Step 1

Annual inspection due.
Call **09 276 6504** to discuss
a sportsafe visit.

Step 5

Maintenance is carried out at a time that suits. Sportsafe provides an 'Installed Certificate of Inspection'.

sportSAFE 5-step Maintenance Programme

Step 2

An inspection is carried out by a SportSafe evaluator.

Step 4

You give the approval to proceed with repairs or if no maintenance is required Sportsafe provides an 'Installed Certificate of Inspection'.

Step 3

A SportSafe report is generated, and if maintenance is required recommendations and costs are given.

How to begin your 5-step Maintenance Programme

SportSafe Inspection

An initial audit and inspection provides you with a comprehensive checklist of all your equipment, safety, maintenance required and any minor 'on-the-spot' adjustments needed.

We advise the 'SportSafe Inspection' is on an annual basis, however a request for equipment repair or an additional safety check can happen at any time. All installed and relocatable equipment is physically checked including all wall and roof fixing points. The condition of all equipment is recorded along with any safety and maintenance recommendations.

A comprehensive report is compiled which includes costs for any equipment requiring repair. This allows you to tailor the maintenance to suit your budgets. We advise all fixed equipment to be prioritised.

These annual inspections and reports can become part of your Health and Safety monitoring procedure and over time become a record of your commitment in this area.

Call **(09) 276 6504** to discuss how **sportSAFE** can help keep you ahead of the game in equipment maintenance.
